Validation at low fidelities for high ROI

With so many design tools on the market knowing the right one to use can have a significant impact on time used to validate a concept.

The left image shows a motion prototype made in about an hour to convey nuanced gestural interactions. After handing off to a developer and no further discussion we were able to test a coded prototype within the week.

Leading through mentorship

Ask any educator and they'll say you learn as much from your students as they do from you.

I've spent my time outside of my UX work teaching and mentoring future UX designers at General Assembly and Parsons. It's my way of giving back to the world thats given me so much.

Some of my students and me
