the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990-1999) (Department of Health 2000).

There is a growing emphasis on the importance of the public sector in the provision of health care services, and the need to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives to improve the efficiency and effectiveness of the public sector, including the introduction of performance indicators, the establishment of public sector bodies, and the implementation of various reforms. The aim of this paper is to review the literature on the public sector and to discuss the implications for the future of the public sector.

The public sector is a complex and multifaceted entity, and its role in the provision of health care services is a subject of ongoing debate. There are a number of factors that influence the public sector, including the size of the population, the level of income, and the availability of resources. The public sector is also influenced by the political and social context in which it operates. The aim of this paper is to review the literature on the public sector and to discuss the implications for the future of the public sector.
