Profile

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the importance of the public sector in the provision of health care services, and the need to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives aimed at improving the efficiency and effectiveness of the public sector, including the introduction of performance indicators and the establishment of public sector bodies. The aim of this paper is to review the literature on the public sector and to discuss the implications for the future of the public sector.

2. Public sector

The public sector is the part of the economy that is owned and controlled by the state. It includes the government, local authorities, and public corporations. The public sector is responsible for the provision of public services, such as health care, education, and social security.

The public sector is a major part of the economy, and its size and scope have increased significantly in recent years. This has led to a number of challenges for the public sector, including the need to raise revenue, to improve efficiency, and to ensure that public services are of high quality.

One of the main challenges facing the public sector is the need to raise revenue. The public sector is a major source of revenue for the state, and its revenue has increased significantly in recent years. This has led to a number of challenges for the public sector, including the need to raise revenue, to improve efficiency, and to ensure that public services are of high quality.

Another challenge facing the public sector is the need to improve efficiency. The public sector is a major part of the economy, and its efficiency has improved significantly in recent years. This has led to a number of challenges for the public sector, including the need to raise revenue, to improve efficiency, and to ensure that public services are of high quality.

Finally, the public sector is also faced with the need to ensure that public services are of high quality. The public sector is a major provider of public services, and its quality has improved significantly in recent years. This has led to a number of challenges for the public sector, including the need to raise revenue, to improve efficiency, and to ensure that public services are of high quality.

3. Conclusion

The public sector is a major part of the economy, and its size and scope have increased significantly in recent years. This has led to a number of challenges for the public sector, including the need to raise revenue, to improve efficiency, and to ensure that public services are of high quality.
