

# App Launch Skeleton

#### slide up feed, slide dashboard from left, darken scrim, slide up welcome card from below

# welcome card 2

(save and personalize)

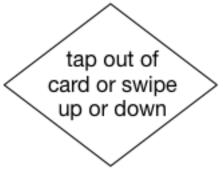

# slide up welcome card, slide up full

screen sign in modal

#### import dialogue

popover

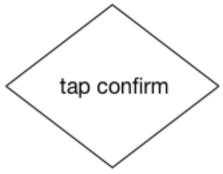

# fade in import

# importing confirmation

### fade out confirmation, slide up edit tickers card from below with keyboard

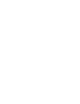

slide up edit tickers card, slide down keyboard, fade out scrim, fade in confirmation

## fade out confirmation, pulse badge

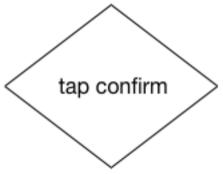

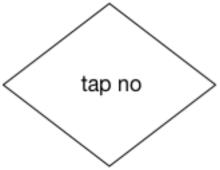

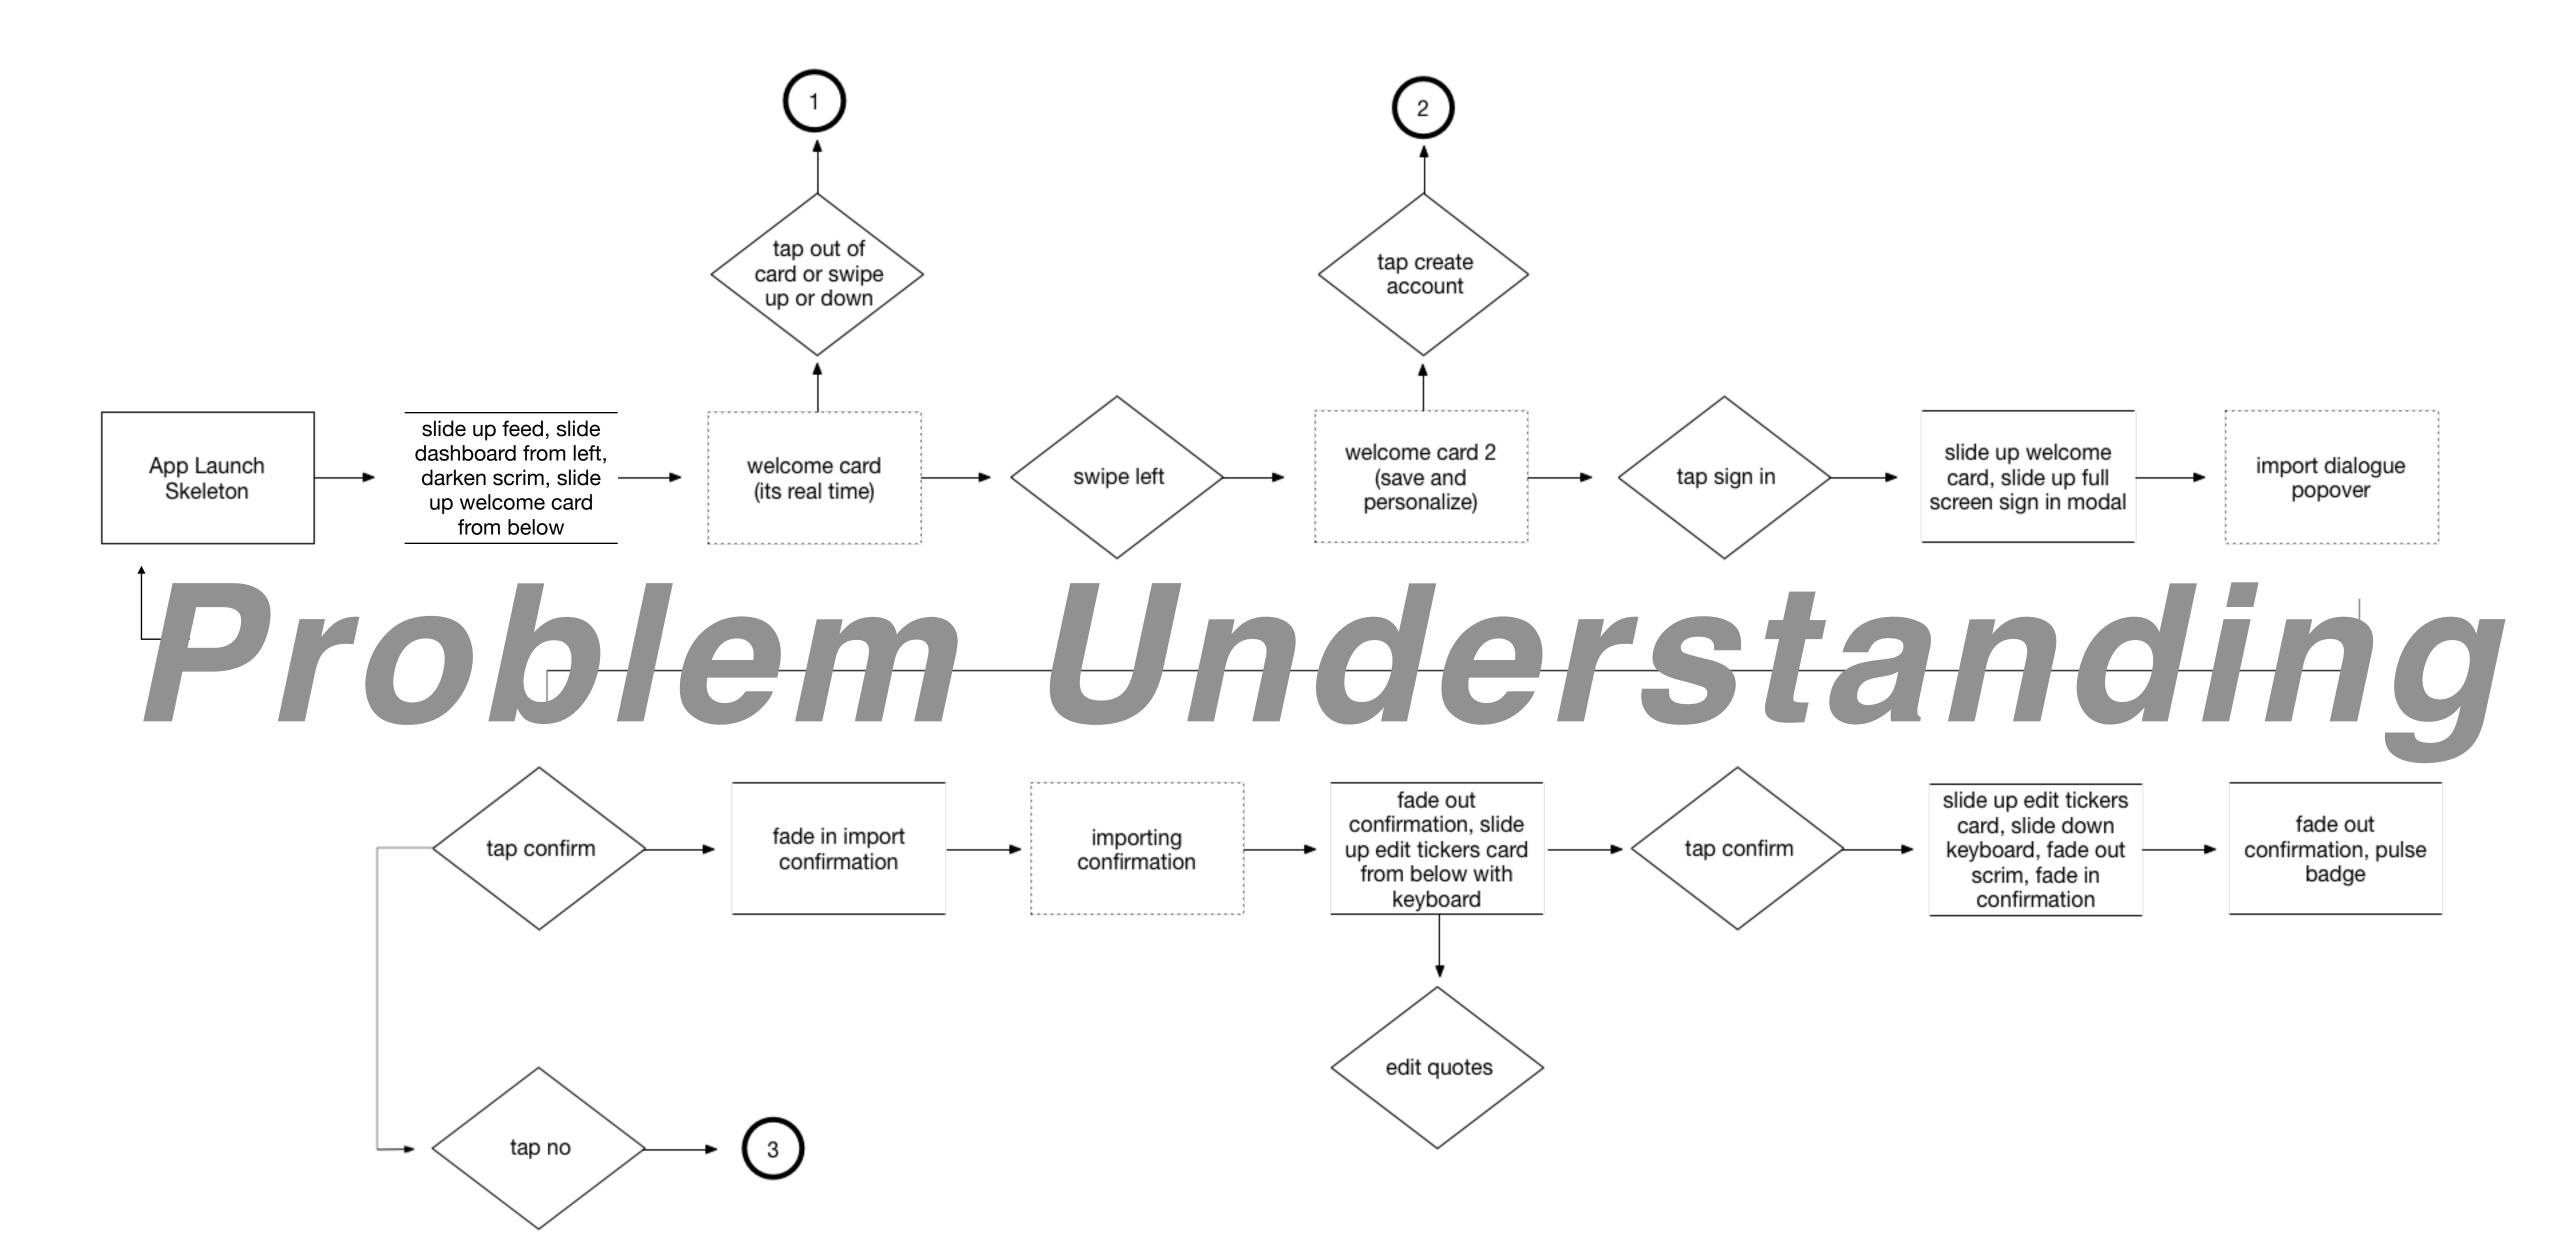

#### welcome card (its real time)

# Problem Understanding

# Charting flows to conversion

Flows help evaluate competition, plan design updates, and facilitate discussions with developers and stakeholders early on in a project with little investment in UI. Much of my work with subscription products benefits from understanding the many paths to subscriber status.
