Raising fidelity with *shared tooling*

The promise of design systems is real! These tools are also super fun to make it turns out. They keep work consistent and help express abstract interactions quickly.

FORM

This section contains the input elements needed for users to submit data through a form. To apply this component, add the `.ng-form` class to a form element. All form control elements are placed side by side within the next row.

For dark theme form input elements, add a `.ng-form-dark` class to your form.

Raising fidelity with shared tooling

The promise of design systems is real! These tools are also super fun to make it turns out. They keep work consistent and help express abstract interactions quickly.

Leading through mentorship

Ask any educator and they'll say you learn as much from your students as they do from you.

I've spent my time outside of my UX work teaching and mentoring future UX designers at General Assembly and Parsons. It's my way of giving back to the world thats given me so much.

Some of my students and me.
